## Introduction of Vapro VBCI 280

*An Environmentally Friendly Neutral pH Rust Remover and Flash Rust Inhibitor*

Vapro VBCI 280 is an environmentally friendly neutral pH rust remover that effectively removes rust and tarnish from both ferrous and non-ferrous metals using Molecular Reaction Surface Technology (MRST) by chelating the ferrous ions from the surface of metal.

Unlike conventional rust removers, which are corrosive, dangerous to use, handle and store, Vapro VBCI 280 is biodegradable and is safe for humans, environment, metals and does not cause any hydrogen embrittlement.

Vapro VBCI 280 is 100% organic and is an excellent replacement for conventional acidic rust removers where chemical waste disposal has to be observed. It does not require rinsing with water or neutralization after application.

### Vapro VBCI 280 Application
