

BIOZYMES-1024 CLEANER & ODOUR ELIMINATOR

UNLOCK THE MAGIC OF NATURE WITH BIOZYMES-1024

BIOZYMES-1024 is a specialized microbial blend that provides exceptional performance over a wide range of organic waste related applications.

BIOZYMES-1024 innovative multiple spore blend can be used to design environmentally safe product solutions for many types of organic waste, odor and stain problems.

The select blend of bio-strains in **BIOZYMES-1024** specifically promote optimum enzymatic activity of protease, lipase, amylase and cellulose, and provides outstanding breakdown of protein, starch, carbohydrates, fats, oils, and grease.

FEATURES

- Eliminates and controls odour quickly - rapid cleaning action - effortless organic
- Accelerated enzymatic degradation – synergistic action allows the multiple spore blend to work faster and more effectively
- Superior germination and outgrowth – results in increased bacterial activity in a variety of organic waste applications
- Enhanced aerobic and anaerobic performance ideal for applications subject to aerobic and anaerobic environments

APPLICATIONS

BIOZYMES-1024 is designed to provide exceptional performance across multiple applications:

- Bathroom cleaner deodorizer
- Carpet and fabric care – odour and stain removal of milk, vomit, urine, feces, blood, coffee, wine, etc.
- Laundry pre-spotter for organic stains
- Odour control in garbage pails, dumpsters, garbage trucks, landfill and municipal sludge

DIRECTIONS

BIOZYMES-1024 is a ready-to-dilute concentrate for customer.

Dilution in water prior to application.

Dilution ration 1 to 9 (do not exceed 9 part of water).

Mix well. Make sure all mixing equipment is free of dust, dirt, residues, acid, germicides, etc.

After filling container, allow air bubbles to escape. Cap immediately and store in a cool dry place.

PRODUCT CHARACTERISTICS

Description	Off white free-flowing liquid, slightly turbid
Stability	Maximum loss of 1 log / year
pH	7.5 – 8.5
Specific Gravity	1.02 – 1.05
Temperature Range	38°F – 145°F (3°C – 63°C)
Nutrient Content	Surfactants, Micronutrients, Biological Enhancers
Bacterial Count	2 Trillion / gallon

STORAGE AND HANDLING

DO NOT FREEZE! Store in a cool, dry location. Do not inhale mists. Avoid excessive skin contact. See SDS.

AVAILABLE PACKAGING

20 Liter Pail and 205 Liter Drum

1450 Government Road West
Kirkland Lake, Ontario P2N 2E9
