

PRODUCT INFORMATION

VAPPRO 70 FOAM TAPE

Function:
Vapour Corrosion
Inhibitor (VCI)

Application:
Electronics
Enclosures

Form:
Emitter

DESCRIPTION

VAPPRO 70 VCI Film Tape is a grey polyurethane foam impregnated with vapour corrosion inhibitor.

It is designed for protection of ferrous and non-ferrous metals against corrosion in long narrow enclosures.

VAPPRO 70 comes with a self-adhesive backing and provides up to 2 years of continuous protection for ferrous and non-ferrous metals.

FEATURES

- Vapour-phase inhibiting actions protects inaccessible and recessed surfaces
- No spraying, wiping, dipping or surface preparation required
- Protected equipment can be used immediately
- Adhesive backing allows fast, no-tool installation
- VCI is self-replenishing
- Easily cut to length for the amount of protection required for various size enclosures
- No regeneration required. Effective for up to 24 months

APPLICATIONS

VAPPRO 70 is designed to protect electrical components, metal parts and other products when placed in non-ventilated enclosures where air exchange is limited. Some examples include:

- Interiors of lighting fixtures
- Long tubular products, pipe and vessels
- Completed assemblies, parts and components
- Electrical and electronic equipment and controls
- Marine and commercial electronic equipment
- Interiors of fuse boxes, conduits and wire ways
- Motors and mechanical controls
- Tools and spare parts

DIRECTIONS FOR USE

Cut tape to length required for your application. Simply peel off the paper backing and mount tape inside the enclosed space. The surface should be dry. The adhesive is designed to adhere to uneven and rough surfaces. When mounting is not required, the tape may be inserted in a box, bag, or container with the paper backing left on the tape.

PACKAGING

- Case – 4 rolls of 2" x 0.25" x 6'

PHYSICAL PROPERTIES

Colour	Grey
Form	Polyurethane Foam
Size	183cm x 2.5cm x 0.6cm

North & South America
