

Your Corrosion Solution

PRODUCT INFORMATION

VAPPRO 119

Function:
Vapour Corrosion
Inhibitor (VCI)

Application:
Adhesive Remover

Form:
Liquid

DESCRIPTION

VAPPRO 119 VCI stripper is a colourless viscous liquid specially developed to remove paints, adhesives, labels from ULD trolleys and aircrafts, without causing metal loss to metal substrates such as aluminum, titanium and its alloys. It does not contain harmful solvents like toluene, xylene, acetone, etc., and is non-flammable.

VAPPRO 119 VCI stripper strips paints and protects metal substrates from corrosion. Unlike conventional liquid paint strippers that evaporate quickly. **VAPPRO 119** remains on the surface to soften, penetrate and remove the coating.

It has a unique combination of vapour and contact inhibiting properties to prevent corrosion, flash rusting and discoloration of aluminum, iron, copper, brass, steel titanium after paint, adhesive or label removal.

VAPPRO 119 VCI stripper effectively strips acrylics, alkyds, vinyls, styrenes, epoxies, enamels, polyesters, etc.

The quality and effectiveness of **VAPPRO 119** is well attested by our clients like the Singapore Airlines Limited (SIA), Nordisk Aviation, Lufthansa, Diethlem Industries, etc.

FEATURES

- Non-flammable
- Fortified with Vapro proprietary vapour corrosion inhibitors
- Viscous liquid suitable of overhead applications
- Does not affect aluminum, titanium and its alloys, etc.
- Strips and protects metal substrates at the same time
- Does not contain flammable solvents like toluene, xylene, acetone, etc.

APPLICATIONS

- Removing lables and adhesive from ULD trolleys
- Removing paints from the body of the aircrafts, metal tanks, spray booth equipment, tire mark on the runway, floors etc.

PACKAGING

- 20 Litre container
- 200 Litre drum

North & South America

Warehouse Address

1450 Government Road West
Kirkland Lake, Ontario P2N 2E9 Canada
