

PRODUCT INFORMATION

VAPPRO 5 & 10

FOAM EMITTERS

NATO STOCK NUMBER # 6850-32-076-1191

NATO STOCK NUMBER # 6850-32-076-1187

Function: Vapour Corrosion Inhibitor (VCI)	Application: Electronic/Electrical Enclosures	Form: Emitter
--	---	-------------------------

DESCRIPTION

VAPPRO 5 & 10 Foam Emitter is a vapour corrosion inhibitor impregnated foam. This VCI foam emitter is particularly suitable for corrosion protection of enclosures, holding electrical gear, relays, contractors, switches, electronic assemblies and connectors. The vapours do not increase

contact resistance in relays and switches and will not affect the characteristics of insulating materials, including high voltage corona or carbon tracking. **VAPPRO 05 & 10 Foam Emitter** bears the **NATO STOCK NUMBER # 6850-32-076-1187 & # 6850-32-076-1187**

FEATURES

- Does not contain nitrites, silicones or phosphate
- Provides up to 24 months of continuous protection
- Does not increase contact resistance in relays and switches
- Does not affect the characteristics of insulating materials, including high voltage corona or carbon tracking
- Multi-metal protection
- Essentially non-toxic
- Does not need to be removed prior to processing or use
- Self-adhesive backing – no tools needed for installation
- Effective up to 10 cubic feet protection
- Protected equipment can be used immediately
- Protects inaccessible and deep recessed areas

APPLICATIONS

VAPPRO 5 & 10 VCI Emitter is designed to protect electrical components, metal parts, and other products when placed in non-ventilated enclosures where air exchange is limited. Some examples include:

- Switchgear and fuse boxes
- Conduits
- Motors and mechanical controls
- Tools, spare parts and components
- Wire way
- Electrical and electronic equipment
- Relays and contracts
- Printed circuit boards

DIRECTIONS FOR USE

- Make sure that all metal surfaces to be protected are within the distance of a 10 cubic ft enclosure.
- The **VAPPRO VCI Emitter** may be positioned at the center, corners of the enclosure, or on the enclosure walls.
- Simply remove the protective plastic wrap from **VAPPRO VCI Emitter** then peel off the back of the paper, releasing the backing. Make sure surfaces are clean and dry. Then mount **VAPPRO VCI Emitter** on the walls of the enclosures.
- When mounting is not required, the emitter may be inserted in a box, bag, or container with the paper backing left on the emitter.

PACKAGING

- VAPPRO 5 (24 Emitters/CS); VAPPRO 10 (12 Emitters/CS)

PHYSICAL PROPERTIES

	Form	Polyurethane Foam
	Appearance	Black
	Weight	10gm & 13gm
	Size	6cm X 3cm X 2.5cm & 9cm X 6.7cm X 2.5cm
