

PRODUCT INFORMATION

VAPPRO 05 VCI FOAM EMITTER

NATO STOCK NUMBER: 6850-32-076-1191.

Function: Vapour Corrosion Inhibitor (VCI)

Application: Electronics Enclosures

Form: Emitter

DESCRIPTION

VAPPRO 05 VCI Foam Emitter is a foam pad impregnated with vapour corrosion inhibitors. This VCI foam emitter is particularly suitable for corrosion protection in enclosures holding electrical gears, relays, contactors, switches, electronic assemblies and connectors. The vapours do not increase contact resistance in relays and switches and will not affect the characteristics of insulating materials which include high voltage corona or carbon tracking.

VAPPRO 05 Foam Emitter bears the NATO STOCK NUMBER: 6850-32-076-1191.

FEATURES

- Does not contain nitrates, silicones or phosphates
- Provides up to 24 months of continuous protection
- Does not increase contact resistance in relays or switches
- Multi-metal protection
- Does not need to be removed prior to processing or use
- Self-adhesive backing so no tools are needed for installation
- Effective up to 5 cubic feet of protection
- Protected equipment can be used immediately
- Vapour-phase inhibiting actions protect inaccessible and deep recessed areas
- Does not affect the characteristics of insulating materials including high voltage corona or carbon tracking

VAPPRO 05 is designed to protect electrical components, metal parts and other products when placed in non-ventilated enclosures where air exchange is limited. Some examples include:

- Switchgear and fuse boxes
- Conduits
- Motor
- Tools, spare parts and components
- Electrical and Electronic Equipment
- Relay and Conduits
- Printed Circuit Board
- Wireways

DIRECTIONS FOR USE

- Make sure all metal surfaces to be protected are within the distance of a 5 cubic foot enclosure
- The **VAPPRO 05** emitter may be positioned at the centre, corners of the enclosure, or on the enclosure walls
- Simply remove the protective plastic wrap from VAPPRO 05 emitter and peel off the paper backing. Make sure the surface is clean and dry then mount on the walls of the enclosure
- When mounting is not required, the emitter may be inserted in a box, bag or container with the paper backing left on the emitter

PHYSICAL PROPERTIES	
Form	Polyurethane Foam
Appearance	Black
Weight	2 grams / emitter
Size	6cm X 3cm X 2.5cm

PACKAGING

Case of 24 pieces
