

## PRODUCT INFORMATION

# VAPPRO 70 FOAM TAPE

Function:

Vapour Corrosion Inhibitor (VCI)

Application: Electronics Enclosures Form: Emitter

#### **DESCRIPTION**

**VAPPRO 70 VCI Film Tape** is a grey polyurethane foam impregnated with a vapour corrosion inhibitor.

It is designed for protection of ferrous and non-ferrous metals against corrosion in long narrow enclosures.

**VAPPRO 70** comes with a self-adhesive backing and provides up to 2 years of continuous protection.

#### **FEATURES**

- Vapour-phase inhibiting action protects inaccessible and recessed surfaces
- No spraying, wiping, dipping or surface preparation required
- Protected equipment can be used immediately
- Adhesive backing allows fast no-tool installation
- VCI is self-replenishing
- Easily cut to length for the amount of protection required in various size enclosures
- Effective for up to 24 months

#### **APPLICATION**

**VAPPRO 70** is designed to protect electrical components, metal parts and other products when place in non-ventilated enclosures where air exchange is limited. Some examples are:

- Interior of lighting fixtures
- Long tubular products, pipes and vessels
- Completed assemblies, parts and components
- Electrical and electronic equipment and controls
- Marine and commercial electronic equipment
- Interiors of fuse boxes, conduits and wireways
- Motors and mechanical controls
- Tools and spare parts

### **DIRECTIONS FOR USE**

Cut tape to length required for application. Make sure the surface is dry. Peel off the paper backing and mount tape inside the enclosed space. The adhesive is designed to adhere to uneven and rough surfaces. When mounting is not required, the tape may be inserted in a box, bag, or container with the paper backing left on.

PHYSICAL PROPERTIES	
Colour	Grey
Form	Polyurethane Foam
Size	183cm x 2.5cm x 0.6cm

#### **PACKAGING**

Case – 4 rolls of 2" x 0.25" x 6'
