

Your Corrosion Solution

PRODUCT INFORMATION

VAPPRO VCI FOAM PAD

Function:
Vapour Corrosion Inhibitor (VCI)

Application:
Electronics Enclosures

Form:
Emitter

DESCRIPTION

VAPPRO VCI Foam Pad is a unique packaging product that combines the cushioning, resiliency and lightweight characteristics of a polyethylene foam sheet with the proven, built in, active and long term corrosion protection of **VAPPRO** inhibitors.

VAPPRO VCI Foam Pad is a low cost, lightweight, all purpose packaging foam. It is resistant to moisture and dust and tolerates extreme temperature changes. It conforms to most shapes without adding bulk and extra weight and, therefore reduces the risk of damage to fragile products in transit.

VAPPRO VCI Foam Pad is a blend of corrosion inhibitors which, through vapor emittance and contact, counteract the corrosive effects of moisture, salt and pollutants.

FEATURES

- **VAPPRO VCI Foam-Pad** can be laminated to a variety of materials including high-density poly, polyfilm, foil, bubble wrap and paper
- **Accelerated Corrosion Test:** **VAPPRO VCI Foam Pad** passes test for the corrosion inhibiting ability of VCI (Volatile Corrosion Inhibitor) vapours as specified in **Federal Test Method Standard 101B** and **Method 4031** including the exhaustion test procedure
- **Shelf life:** **VAPPRO VCI Foam-Pad** has a shelf life of 5 years (stored at 85°F or less)
- **Handling:** No special handling precautions required

PACKAGING

- 10" x 10" x 1/4" – 50 pieces per carton
- Custom sizes available with minimum quantity requirements

Manufacturing Facility
1450 Government Rd., West
Kirkland Lake, ON
P2N 2E9 Canada
